

## Freedom and Opportunity Agenda Plan to Fight Inflation

American families are confronting historic inflation and skyrocketing costs off the back of unchecked federal spending. Due to Bidenflation, stagnant wages have been stretched further to support families through runaway property taxes, on-the-rise utility bills, and an overall higher cost of living.

In order to provide relief to Hoosiers, Mike Braun's plan to implement comprehensive fiscal policies that address the immediate needs of Hoosier families, as well as the long-term stability of the state economy includes; tax relief, good-paying jobs, affordable and reliable energy, streamlined regulations, and a smaller, more efficient state government.

*"Traveling Indiana I hear from so many Hoosiers who feel like they're barely keeping their head above water due to Bidenflation, rising utility bills, high property taxes, and wages that just aren't keeping up. My plan is directed at Hoosier families sitting around the kitchen table trying to make ends meet: My top priority is to make things better for you."*

– Mike Braun

### Mike Braun's agenda proposes the following solutions to improve the economy and combat inflation in Indiana.

- 1. Historic Tax Relief** - Allow Hoosiers access to more of their paychecks as they contend with Bidenflation's impact on their ability to afford everyday life.
- 2. Good-Paying Jobs** - Combat wage stagnation by concentrating on the creation of good-paying jobs and incentivizing employers to raise wages.
- 3. Affordable and Reliable Energy** - Embrace an energy policy that unleashes the prosperity of our state's abundant natural resources and delivers new technologies that provide clean and affordable energy.
- 4. Streamlined Regulations and Government Services** - Protect small businesses facing unnecessary and costly regulations and create an environment for small businesses to thrive.
- 5. Leaner, Efficient State Government** - Institute private sector principles across state government to ensure Hoosiers are getting the services they need with greater efficiency and effectiveness.
